TTDS come with one free TF USB loader

the packing front-view

the packing back-view

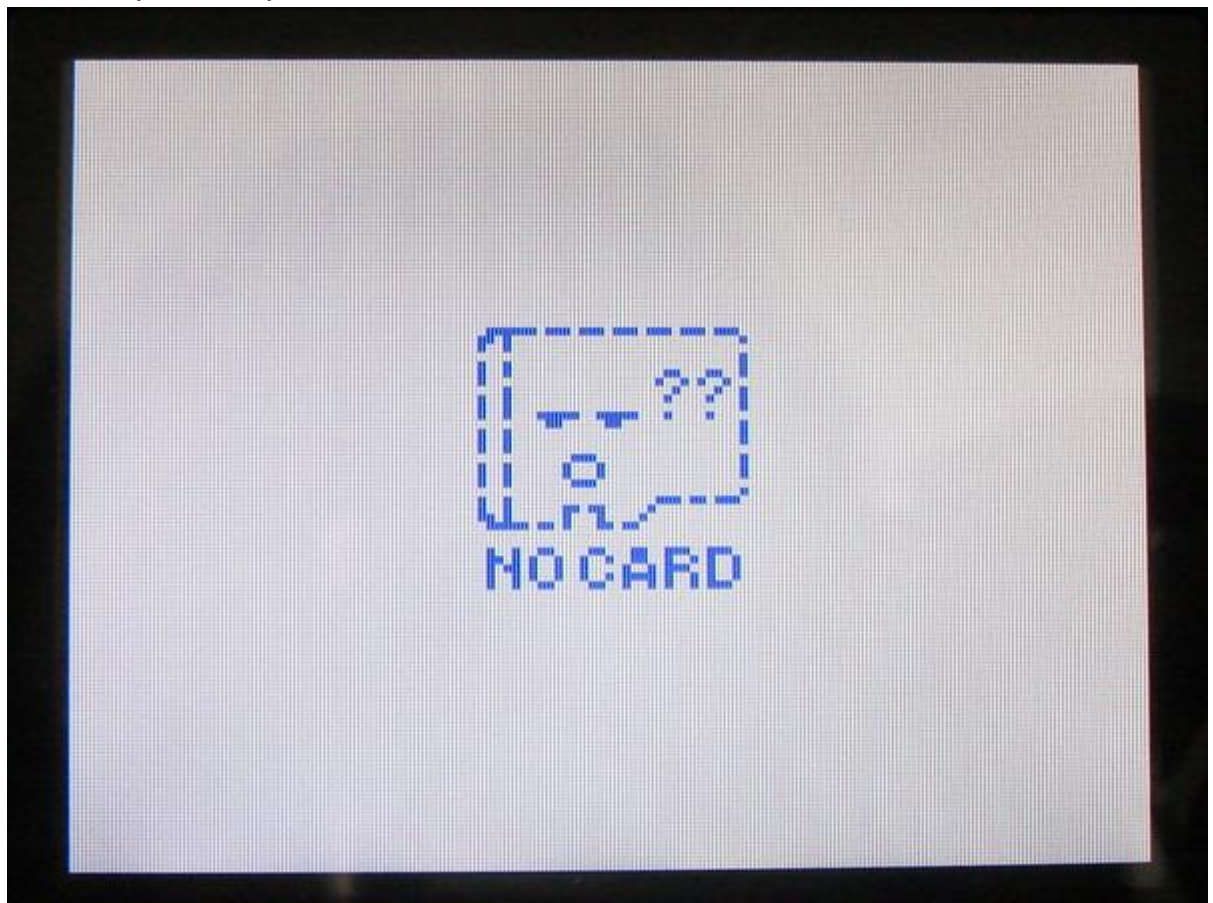

Here is the PAPER BOX version packing:

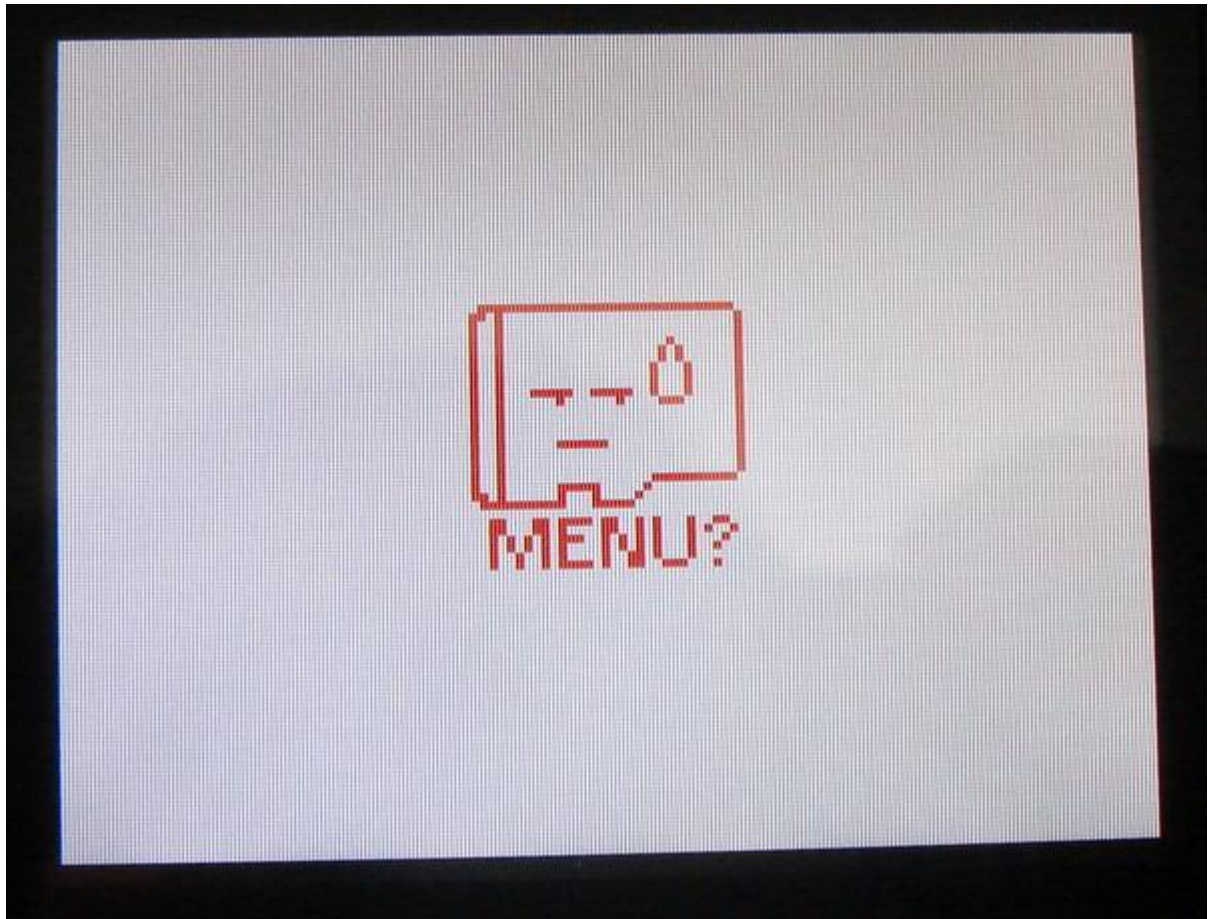

how to run at first time:

if you put the TTDS to NDS/NDS-L and run without TF card, the screen will show like this, it's mean you need to put one TF card inside (it's doesn't matter the TF card have how many memory size)

if you put the TF card inside, but don't copy any TTDS menu to it, system can't run still and will ask you copy menu to TF :

ok, here is the operation for make TTDS work with you:

[1] Open the driver CD, go to "x:\CDR - Driver CD\TTDS" , and unzip the "TTDS_English_Driver_Vx.xx.zip" to root of your TF card .

and you can find the last version in here:

http://www.neoflash.com/go/index.php?option=com_content&task=category§ionid=4&id=16&Itemid=30

If you want to use other language, you can choose different menu pack too, now support Chinese simplified / Chinese traditional and English 3 version ,more language version will coming soon.

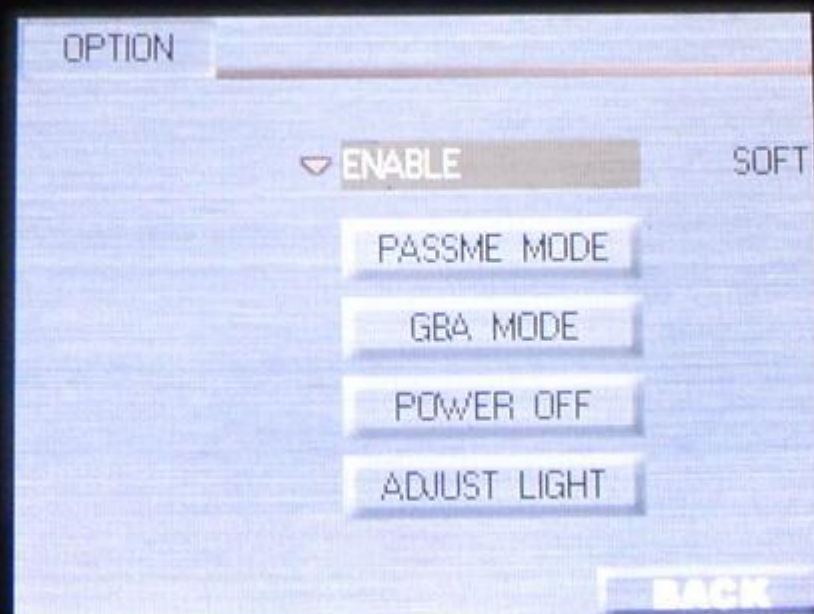

[2] Insert the TF to TTDS, power on and enjoy it.

OPTION		FILE[1/103]
FILE ICON	FILE NAME	FILE SIZE
	pt0002_test tool V8.nds	75 K
	MK56_save_test_01_internal	46 K

and the ENGLISH TTDS menu come with the DSOrganize 2.9 NEO Version, now your NDS have become to one powerful PDA already!

Project description: DSOrganize is an organizer application that includes functions to do a whole slew of things on the Nintendo DS. This version features calendar/addressbook/todo/scribble pad/calculator/file browser/homebrew database/web browser/irc client. You can add plugins or executables to DSOrganize, and it will autopatch and boot homebrew on virtually all cards. The file browser will let you view or edit text and html, record wav files, listen to wav/mp3/ogg/flac/m4a/aac/sid/spc/nsf/sndh/mod/it/s3m/xm files as well as streaming mp3/ogg/aac, and view gif/jpg/bmp/png files. The web browser includes support for basic css, images, forms, and most html tags!
